Steve,

On behalf of my wife, Alicia, thank you for designing and building the oasis that is our backyard pool, spa and bar. When I purchased this home I looked and the large, flat backyard as the perfect canvas for you to work your magic and you exceeded our expectations on so many levels.

When people visit they often ask us how we came up with the unique design traits like the beach entrance, island spa, footbridge and the swim shelf...to say nothing about the circular swim-up bar. My simple response to them is, "You have to meet Steve. This all came out of his head."

Beyond the design, I know the project involved an enormous number of complications including having to build up the entire pool and hardscape to account for impenetrable granite only 5 feet below the surface. Making your vision a reality couldn't have been accomplished without the assistance of the teams of architects, builders, landscapers, plumbers and masons that you brought to the site over almost a one year period. They were all fantastic.

In short, I hope we have the opportunity to build another pool with you some day. You are the best in the business. The only problem is that we like this pool so much I don't see us ever leaving it. I also don't know how you top it...but I look forward to finding out.

Thanks again for everything my friend.

Regards,

Matt DiLiberto
